

EMPART2015 Excels in Education at International City Jaipur, Rajasthan in India!

2nd Annual ACEE INDO-EM Pediatric Board Review Course held at Mahatma Gandhi Medical College and Hospital, Jaipur India

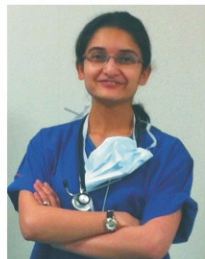

EMPART: Emergency Medical Pediatric Advances and Recent Therapeutics Course is the Annual Board Review Course for all Candidates pursuing a FACEE under the aegis of the Academic College of Emergency Experts in India.

Attended by over 50 Trainees this course gave an exposure on the complete body of knowledge about Pediatric Emergency Medicine.

The Second Annual ACEE Pediatric Emergency Medicine Board Review Course was successfully held at Mahatma Gandhi Medical College University of Medical Sciences & Technology Jaipur, Rajasthan, India.

Lead by Famous Research and Pediatric Emergency Physician Professor, Dr. Prashant Mahajan, this course was taught over 5 Days with faculty from United States of America and India. Dr. Binita Shah, Distinguished Professor of Pediatric Emergency Medicine from the State University of New York, Downstate Medical Center was the Co-Director for the course.

Dr. Ami Shah (USA), Dr. Abhijeet Saha (RML-PGIMER Delhi) and Dr. Prerna Batra (UCMS Delhi) were the other faculty for the course. The Master Class was organized by ACEE Leader Dr. Nitin Trivedi who was a vibrant academician and a young aspiring Pediatric Emergency Physician from Jaipur, India. Children's Hospital Michigan of the Wayne State University, SUNY Downstate New York and MGMCMST, Jaipur along with INDUSEM were the main partners for this 2nd Annual Pediatric Emergency Medicine Board Review Course by the Academic College of Emergency Experts of India.

INDUSEM : Through The Resident's Eyes

By Dr. Indrani Sardesai, [MBBS, PGY2-Resident EM (Global Hospitals, Mumbai)]

When asked to write a small article on INDUSEM from the student's perspective, I was glad to oblige, and a little bit daunted that I had to fit it into around seven fifty words because there is so much to say about it. But I'll give it my best effort.

INDUSEM, as the name suggests, is an international conglomerate of leaders and/or aspiring leaders in the field of Emergency Medicine. Having only joined the ranks a year ago, I've been to two of INDUSEM's summits. A few highlights jump to the fore.

First and foremost, INDUSEM motivates. When I attended last year, I was a newbie. So much so that I'd only had three months of experience in the department of Emergency Medicine, and I dreaded the summit, thinking that I would feel left out and awkward. Quite contrary to that fear, I ended up mingling with other students, of varying experience, but all of them sharing in the feeling of enthusiasm for this branch that is still in its toddler stages in our country. I was awed by the sheer determination, the unquenchable thirst for knowledge, and importantly, the 'get it done' attitude. We all know the challenges we're facing as a yet emerging branch, but the grit shown by our united community is a thing of beauty.

INDUSEM gives us the opportunity to interact with people who are from places where EM is well established. It helps us to envision where we ought to be, what we are working everyday towards. These well-oiled, experienced, faculty members take the time to share their knowledge and experiences with us their struggles too. Their stories medically or otherwise, are much like ours, and in that we find a common ground. There is a feeling of 'oneness' within our country, and globally. I must say, having observed the faculty from the US, I take home the message of optimism. They are full of energy, and vivacity; it's inspirational. If even they believe that we will achieve the future we are striving for, then it makes it easy for us to believe too. It doesn't come without hardship, and it doesn't come without hard work, but do I believe it will come? Absolutely.

What I admire about INDUSEM is that they think about rounding off the individual. Every year the pre-summit has topics aside from just the medical aspect, that aid in our acquisition of worldly wisdom. This year was all about management, and God knows how much we end up managing beyond just the things we are 'supposed' to manage. I'm glad the institution picks the experts to share their knowledge, and it is not a case of the blind leading the blind.

The summit itself has a great series of lectures not only giving us the chance to learn from the established faculty, but also giving a stage to the newer generation to stretch their wings. The workshops are helpful. In fact, a change from last year's summit was noticed in the longer hours given to the skills schools. It was an opinion raised from the student's end last year, and this year there was an entire day dedicated to it. Our opinions clearly matter to them. They listen. It is forward evolution. In the background, there are board meetings relating to important topics; white-papers being constructed, trends being set, policies being made. The other relevant courses continue to be well executed. It cannot be an easy undertaking to tend to the organization and education of three thousand plus candidates. Sure, there may have been shortcomings it is easier to focus on those, but the successes were tremendous. If you left the summit with even just the feeling that you are not alone, consider it a success.

INDUSEM has established a lot in its decade of existence. I urge you to take home the messages spoken and those that remain unspoken.

We are not laymen, we are not mediocre. We are striving to be amongst the elite group of individuals tasked to saving lives. We are optimistic about the future of EM in our country, and the ongoing bond with the global EM community. We are one. I hope to see you all, and others that you have inspired, next year at Delhi! Until then, save lives with fervor.

Trauma & Emergency TEAMS

Academic Medicine Sentinel

"Proclaiming and Promoting Academic Leadership"

DPU
Dr. D.Y. PATIL VIDYAPEETH, PUNE
(DEEMED UNIVERSITY)

Volume : 08
Edition : 01
Jan-March 2015

Message by the President, DPU

It is indeed a matter of pride and honour that D.Y. Patil Vidyapeeth, Pune has assumed the task of publication of the TEAMS Newsletter on behalf of ACEE. This platform is a splendid opportunity for the students and faculty to place their innovative ideas and explore their research potential.

I wish to place on record that DPU has had the distinction of being the first to offer MD Emergency Medicine in the city of Pune. The state-of-art infrastructure coupled with dedicated and well qualified faculty provide an unique learning experience on the campus.

I am sure that the Newsletter will reflect the recent trends in Emergency Medicine and nurture a multidisciplinary approach in patient care, which is the need of the hour.

I wish the TEAMS team all success in their endeavour.

P. D. Patil
President, DPU, Pune

Message by the Chancellor, DPU

Interdisciplinary approach for health care has been a burning issue and Emergency Medicine is one such speciality which addresses this aspect. We at DPU, are privileged to have the state-of-art infrastructure with ample clinical material for our students.

I am delighted by the fact that DPU will now be publishing the TEAMS Newsletter on behalf of ACEE. This document should highlight the importance of the team approach in the real sense and will provide an opportunity for faculty and students to discuss interesting case capsules.

I wish the editors good luck in their endeavour.

K. B. Powar
Chancellor, DPU, Pune

Message by the Vice Chancellor, DPU

I am extremely happy to pen down a few lines in this inaugural issue of the TEAMS Newsletter published by Dr. D.Y. Patil Vidyapeeth, Pune.

Despite the proliferation of urgent care centers, the number of people seeking emergency care grows every year. Department of Emergency Medicine is the first contact point for a critical patient entering the hospital. DPU is proud to be the first to have the MD course in Emergency Medicine in the city of Pune.

I am sure that the Newsletter will bring forth the current practices in emergency care and highlight some of the significant achievements and milestones in the discipline.

I wish all success for TEAMS.

P. N. Razdan
Vice Chancellor, DPU, Pune

From the Desk of Editors

Welcome to the first publication of TEAMS by Dr. D.Y. Patil Vidyapeeth, Pune. At the outset, we express our sincere gratitude to the office bearers of ACEE to have granted us permission to take up this prestigious task.

TEAMS was born in 2007 and first published in 2008. This is an unique opportunity for the experts and students of Emergency Medicine and various specialities like Surgery, Medicine and Anaesthesiology & Critical Care to bring out the best protocols in patient management and foster an interdisciplinary algorithm in the true sense.

We request all the torch bearers of Emergency Medicine to send us their short articles, glimpses of important related events, interesting cases and achievements.

We assure that the legacy of TEAMS will be carried forward with the same flavour and vibrancy.

World Wide Release of INDUSEM Book on Patient Safety & Quality Health Care

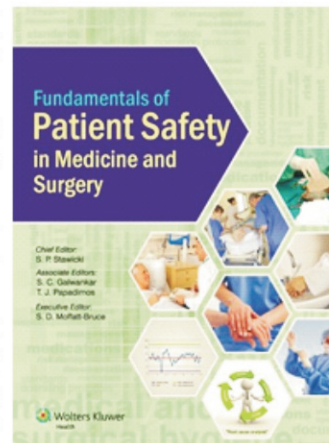

The Honorable Health Minister of India Shri. J.P. Nadda released the Landmark Textbook of "Fundamentals of Patient Safety in Medicine and Surgery" was released during the event which is a mark of the INDO-US Partnership and its Commitment to Quality HealthCare.

This book written by INDUSEM Leaders presents a practical approach to patient safety issues with a focus on evolution and understanding the key concepts in health care and turning them into implementable actions. With its contemporary approach and lucid presentation, this book is a valuable resource for practicing doctors in medicine and surgery to treat their patients with care, diligence, and vigilance and contribute to a safer practice in health care.

Key Features:

- Clinical vignettes, presenting hypothetical case scenarios, that set the patient safety agenda for each chapter
- Emphasis on evidence-based approaches and research methodologies to present potential solutions and preventive strategies
- Presents a multidisciplinary, inter-professional collection of patient safety pearls with global focus
- Provides smooth navigation into clinical patient safety topics including the role of modern technology Important points summarized at the end of each chapter for quick review

About INDUSEM:

The INDUSEM mission is to envision and implement the future of Patient Care across the world. The partnership brings together Expert Educators, Inquisitive Innovators and Physicians supporting Safe Patient Care across India, United States and the World. INDUSEM is the Top International Partnership across the World and brings together Institutions, Individuals and Initiatives focused on improving patient care globally. Till date INDUSEM has reached over 50,000 Experts and its reach continues to grow daily. For more information, visit www.indusem.org

About The Annual INDUSEM Summit:

Annual INDUSEM Summits and Education Activities began in 2005. Since inception INDUSEM has attracted over 50,000 Delegates to its Annual Meetings and Education Programs where over 5000 hours of education have been conducted successfully to medical students, nurses, residents, faculty, policy makers and practicing doctors with over 200 Indian and American faculty Leading these efforts. The INDUSEM Summit is held every year in India as a Level One International Meeting by and between Experts in areas of Emergency Medicine, Trauma and Disaster Health who bring Basic Science, Clinical Medicine and Public Health under one united platform of Education, Research thus fortifying Science and Technology Relations between USA, India and the World.

About ACEE:

The Academic College of Emergency Experts was established by Leaders of INDUSEM to create a guild of expert clinicians who are have a mastery at providing safe patient care with high quality therapeutics based on latest evidence based medicine. The only Unique College in Asia ACEE bestows affiliation only after a rigorous coaching and testing process hereby maintaining its high standards of commitment to education and excellence. It surpasses the erstwhile ideology of existing academic colleges where affiliation is based on recommendation. The College offers its Fellowship in various areas of Emergency Medicine, Emergency Pediatrics. Toxicology, Emergency Nursing etc. For More Information. Visit www.acee-india.org

10th Annual INDUSEM Summit 2014, Lucknow

The Grand Success

Theme: "Money, Management and Manpower in Medicine"

INDUSEM2014 @ KGMU
International Convention
Center Lucknow, India

The 10th Annual INDUSEM2014 was held simultaneously with the 9th Annual Assembly of the Academic Council for Emergency and Trauma. This meeting was hosted by the King George Medical University and the Indian Institute of Management Lucknow in partnership with all the Medical Colleges in Lucknow from 13th October to 19th October 2014. Around 15 Medical Institutions from Uttar Pradesh Including Medical and Nursing Colleges hosted this Grand Decennial Conference.

3500 Delegates participated from over 300 Medical Institutions across India and the United States.

Held over 7 days, the Summit started off with a Curtain Raiser Event at the Uttar Pradesh Rural Institute of Medical Sciences and Research in Saifai, India. The Pre-Summit was held at Indian Institute of Management Lucknow which was a stunning success and was attended by 200 Health Care Leaders from across India. The Main Summit was inaugurated by Governor Shri. Ram Naik in presence of Dr. Abhishek Mishra, Science and Technology Minister in Government of Uttar Pradesh and Health Research Secretary of India Dr. VM Katoch. Various Officials of the Government of United States, India and Uttar Pradesh were present at the grand Event.

Alongside the Annual Meetings of INCIITTE, ACET, The Convocations of ACEE and ACEN, this year two Landmark National Round Tables on Road Safety and Organ Transplantation were held at INDUSEM where Government of India and United States came together to develop various Initiatives to advance the Public Health Agenda if Road Safety and Organ Transplantation in India.

INDUSEM2014 was held over 7 Days and attended by 3500 Delegates.

INDUSEM has now directed its focus on delivery of Quality Health Care across India with a vision to enhance patient safety and strengthen public health and develop skills in India.

Launch of Jeevan Jyoti Rashtriya Abhiyan and Jan Suraksha Abhiyan in Himachal Pradesh (November 2014)

Position Paper

The 2014 Academic College of Emergency Experts in India's Education Development Committee (EDC) White Paper on establishing an academic department of Emergency Medicine in India – Guidelines for Staffing, Infrastructure, Resources, Curriculum and Training
Praveen Aggarwal, Sagar Galwankar, Om Prakash Kalra, Ashish Bhalla, Sanjeev Bhoi, Sundarajan Sundarakumar

Emergency medicine services and training in Emergency Medicine (EM) has developed to a large extent in developed countries but its establishment is far from optimal in developing countries. In India, Medical Council of India (MCI) has taken great steps by notifying EM as a separate specialty and so far 20 medical colleges have already initiated 3-year training program in EM. However, there has been shortage of trained faculty, and ambiguity regarding curriculum, rotation policy, infrastructure, teachers' eligibility qualifications and scheme of examination. Academic College of Emergency Experts in India (ACEE-India) has been a powerful advocate for developing Academic EM in India. The ACEE's Education Development Committee (EDC) was created to chalk out guidelines for staffing, infrastructure, resources, curriculum, and training which may be of help to the MCI and the National Board of Examinations (NBE) to set standards for starting 3-year training program in EM and develop the departments of EM as centers of quality education, research, and treatment across India. This paper has made an attempt to give recommendations so as to provide a uniform framework to the institutions, thus guiding them towards establishing an academic Department of EM for starting the 3-year training program in the specialty of EM.
