'Developing a roadmap for injury prevention and control in India'

'Developing a roadmap for injury prevention and control in India', organized by MOHFW, GOI and CDC, Atlanta, USA held at Ram Manohar Lohia Hospital, New Delhi on 14-15 February 2011. The delegation was represented by Dr Vikas Kapil CDC Atlanta, Dr Ranabir Pal from India and other members from various institutions from India & USA

Trauma Registry Pilot program was piloted in 2010 for an accessible and generalizable method for developing a trauma registry in India - to confirm the validation of injury data base and provide the comprehensive foundation to adopt trauma registry in India, to assess and evaluate comprehensive approach of trauma registry, and to assess the challenges and diversity of this system adaptation.

The computed data of the Trauma Registry Pilot program was presented in the joint collaborative meeting of Directorate General of Health Services, Ministry of Health & Family Welfare, Government of India (MOHFW-GOI) with Center for Disease Control and Prevention, (CDC), Atlanta, USA.

The researchers concluded that data collection through active and well organized trauma registry forms the basis of quality trauma care that can be used for accreditation, verification and designation of trauma centers with the challenges in implementing trauma registry, namely Registry software for storage of large amount of data with ICD Coding, data processing and analysis tools, sufficient funding and manpower.

Academic Medicine Sentinel

"Proclaiming and Promoting Academic Leadership"

From the Desk of Editor

Dear Colleagues,

Welcome to INDUSEM 2011

We the Board of Directors of INDUSEM are honored by your presence in this Academic Extravaganza in the capital city of our nation. We shall be enlightening you on the academic body of knowledge of Emergency Medicine the past, present & the future. You as a leader from your respective institution will definitely take a basket of knowledge back to your place, share, spread, implement and develop the science called EMERGENCY MEDICINE with a wider perspective in the interest of our people, community and the nation.

We welcome and thank the faculties from USA, Israel, WADEM, NDMA and other premier institutions of our country for sharing their knowledge and expertise on a common platform only to foster the science of EM in India.

I congratulate the new young leaders of FACEE and wish them to take a big leadership role in developing the science of EM.

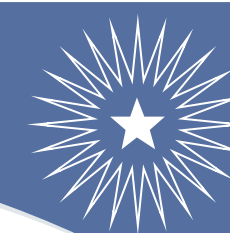

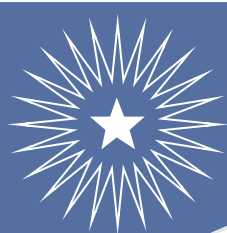

We are honored by WADEM, selecting India as the venue for the 19th World Congress for Disaster & Emergency Medicine in the year 2015. It is a moment of pride to our Nation, celebration and joy for all the Indians who strived hard to develop the science of Emergency, Trauma & Disaster Medicine in this part of the world.

JAIHIND.

World Congress for Disaster and Emergency Medicine 2015

New Delhi, India

It's a great honour, privilege and pride for our country as WADEM endorses India as the Venue for World Congress for Disaster and Emergency Medicine in the year 2015.

A number of premier national organizations joined hands together in a bid to host the World Congress in Disaster and Emergency Medicine (19th WCDEM) in India. These were the NDMA (National Disaster Management Authority), NIDM (National Institute of Disaster Management), AIIMS (All-India Institute of Medical Sciences), TISS (Tata Institute of Social Sciences), INDUS-EM (The INDO-US Emergency and Trauma Collaborative), NIMHANS (the National Institute for Mental Health and NeuroSciences), Post-Graduate Institute Chandigarh, among others. The World Congress is likely to be hosted in the capital city of New Delhi and hopes to bring together the best disaster experts from the SEARO (South-East Asia Region) countries which are Bhutan, Bangladesh, DPR Korea, India, Indonesia, Myanmar, Maldives, Nepal, Sri Lanka, Thailand.

Even though these are countries most commonly affected by disasters and conflict, the SEARO countries will be hosting the World Congress for the

winning the bid for WCDEM 2015**

first time in their region. This event will provide the impetus to the various disaster preparedness and mitigation programs, at the national and the community level, by attracting multidisciplinary disaster workers onto a common platform, for discussion. As a Board member of the World Association of Disaster and Emergency Medicine experts, it is an honor to invite you to Incredible India for your academic contribution and support to the science of disaster and emergency medicine.

I am sure this congress would make the whole world be prepared to fight any threat of any nature either manmade or environment.

Lets join hands and work as a Team to make this Congress a great academic extravaganza and learn to implement the structure and protocol for disaster preparedness.

Namaste!

Dr Nobojit Roy
