Auditorium, AIIMS Raipur

ACES 24

Acute Care Electrocardiography Symposium

Welcome !

ECG is a simple, bedside investigation in acute care settings. Many crucial diagnoses can be picked up on ECG and it may guide treatment and prognosis. Yet it remains one of the most under-used & misinterpreted investigation in the ED.

We, at the Department of Trauma & Emergency, AIIMS Raipur bring to you **ACES 24, the 2nd National Acute Care Electrocardiography Symposium**. ACES 24 brings the experts from all over the country who shall discuss essential concepts, pearls and pitfalls regarding emergency ECGs. Looking at the interest and enthusiasm of the participants in the previous years' conference, organizing team has expanded the scientific program to be more inclusive and comprehensive.

Day 1 (Level 1 basic ECG workshop) will focus on the basic interpretation of emergency ECGs. Topics like cardiac impulse generation, understanding rate, rhythm, axis etc. will be covered.

On Day 2 (Advanced ECG Symposium) you will be taken one step ahead, where experts will share their knowledge and experience regarding the role of ECG in crucial decision-making in acute care settings. Complex aspects of ECG interpretation, like rhythm interpretation, subtle yet important missed ischemia, and diagnosis of metabolic / toxic exposures will be discussed.

Looking forward to a great learning experience with you!

See you @ACES 24
