INDUSEM Salutes Prime Minister Modi on his Address to USA Parliament

From the Desk of INDUSEM Chief Executive Officer Dr. Sagar Galwankar
INDUSEM Commends and Congratulates Prime Minister Shri. Narendra Modi on his historic address to the Parliament of the United States of America (US Congress). Today we all feel proud as a part of the INDO-US Emergency and Trauma Collaborative that the vision we cherished for over 12 years was reinforced by what we heard from our Leader PM. Shri Modi.

The Following are some Lines from a Marvelous Speech which have touched mine and every INDUS Citizens Hearts.
"Today: Across its streets and institutions; in its villages and cities; anchored in equal respect for all faiths; and in the melody of hundreds of its languages and dialects.
India lives as one; India grows as one; India celebrates as one."

From the Desk of Editor

Dear Colleagues,

"Today: Across its streets and institutions; in its villages and cities; anchored in equal respect for all faiths; and in the melody of hundreds of its languages and dialects.

India lives as one; India grows as one; India celebrates as one." are the words of our PM.

"Connecting our two nations is also a unique and dynamic bridge of three million Indian Americans. Today, they are among your best CEOs; academics; astronauts; scientists; economists; doctors; even spelling bee champions. They are your strength. They are also the pride of India. They symbolize the best of both our societies." Was rightly told by our PM during his visit to USA.

"**Being Good at Home and Great with our own people**" is what India and its leaders have practiced for centuries way back from the medieval to historic to now the democratic era. President Obama and Prime Minister Modi resolved that HealthCare is an area of need where both nations can play a major role.

"**When Brains Meet-Bodies Build**": INDUSEM advocates this passionately.

Health Security is a major challenge to all nations. Ebola and ZIKA continue to be a looming threat and Microbial Invasion is something which can wipe out a whole nation and its economy within a short span. India has a large population and a larger challenge to contain diseases and foster health. United States has the resources, the technology and the experience to work with India to find solutions to the challenges thus benefitting the world at large.

"**When the World's Largest and the World's Oldest Democracies Work Together the World Progresses as One**"
We INDUSEM believe the same.

"Today, a mere distance of 3 miles separates the Martin Luther King memorial at Tidal Basin from the statue of Gandhi at Massachusetts Avenue. This proximity of their memorials in Washington mirrors the closeness of ideals and values they believed in."

"Connecting our two nations is also a unique and dynamic bridge of three million Indian Americans. Today, they are among your best CEOs; academics; astronauts; scientists; economists; doctors; even spelling bee champions. They are your strength. They are also the pride of India. They symbolize the best of both our societies."

"Transformative American technologies in India and growing investment by Indian companies in the United States both have a positive impact on the lives of our citizens"

"Ideas which can focus: Not just on creating wealth but also creating value for our societies; Not just on immediate gains but also long term benefits; Not just on sharing best practices but also shaping partnerships; and Not just on building a bright future for our peoples, but in being a bridge to a more united, humane and prosperous world. And, important for the success of this journey would be a need to view it with new eyes and new sensitivities.

When we do this, we will realize the full promise of this extraordinary relationship."

The mere friendship between the two leaders PM Modi and President Obama is very palpable and positively visible.

It was not practiced and not planned....It is all natural!

To get 9 Standing Ovation and more than 25 Clapping Interventions in a speech in US Congress is record setting for any world leader.

We are proud of this.

It signifies a firm resolve of the leaders and the administration in USA and India to build a new world.

"Being Good at Home and Great with our own people" is what India and its leaders have practiced for centuries way back from the medieval to historic to now the democratic era. History always plays a role in the Present.

The coming together of the two leaders signifies the unity between the two nations to expedite the process of progress and peace. President Obama and Prime Minister Modi resolved that HealthCare is an area of need where both nations can play a major role.

"When Brains Meet-Bodies Build": INDUSEM advocates this passionately.

Health Security is a major challenge to all nations. Ebola and ZIKA continue to be a looming threat and Microbial Invasion is something which can wipe out a whole nation and its economy within a short span.

India has a large population and a larger challenge to contain diseases and foster health. United States has the resources, the technology and the experience to work with India to find solutions to the challenges thus benefitting the world at large. Indian Technocrats, Researchers, Innovators, Administrators and Physicians in the United States provides a major talent resource. This resource can only grow in a vibrant India. USA has recognized this fact and India has understood the same extremely well.

Health Care in India needs the technical inputs from United States to create processes for accrediting quality benchmarks for patient care, instituting strong public health education infrastructures, building the Nano Biotech Innovations Corridor, strengthening and modifying the Health Education system towards making it more patient centric and personalized. It is much defined that definitely the United States can do all of the above.

In return India can provide the much needed constant supply of talent and work force to the United States who will push trade and development by and between the two nations.

EMA Leaders meet Union Health Minister Shri. JP Nadda

Principal Secretary of The Emergency Medicine Association Dr. Vimal Krishnan Pillai and his team met with Union Minister of Health for the Government of India Shri. JP. Nadda.

The current status of emergency services in India at the grass root level were analyzed introspected. "Academic Emergency Medicine is the backbone of the pursuit to build quality health services in the country and that is what we discussed in the meeting" said Dr. Vimal Krishnan, Principal Secretary of EMA India.

"Progressive strategies like The inculcation of resuscitation sciences into the medical undergraduate curriculum and methods towards improvement in community awareness on basic resuscitation measures were also discussed in the meeting" said Dr. Jayaraj Balakrishnan, EMA Executive Director.

Dr. Vimal Said that "The Hon'ble Minister added that accreditation bodies and policy makers should work in synergy to deliver quality Emergency services."

The EMA Leadership appraised Shri. Nadda of all the current obstacles which were preventing the expected exponential growth of Emergency medicine in India.

Minister Nadda Appreciated the work of INDUSEM, The INDO-US Emergency and Trauma Collaborative under and the Leadership of Dr. Sagar Galwankar which over the past decade has being instrumental in nurturing academic Emergency Medicine in India. Shri. Nadda added that his role lies in filling the gap between accreditation bodies and the national policy makers. He also welcomed the efforts of the Academic College of Emergency Experts (ACEE) to improve quality in academic Emergency Medicine and translating it to patient centric research.

A man of action true to his word was Shri. Nadda was quick to analyze the current state of matters and was prompt with adequate solutions. He preferred both short term goals and a long term visionary plan with emphasis on formulating a roadmap for Emergency Medicine.

The Hon'ble Union Minister for Health and Family Welfare Shri. J P Nadda with EMA India Leadership ~from left to right Dr. Siju V Abraham, Dr. Vimal Krishnan & Dr. Jayaraj Balakrishnan

The white paper on Emergency Medicine by INDUSEM group was extensively reviewed in the meeting and was well received by Shri J P Nadda.

EMA India always has believed that 'state of the art emergency health care is a fundamental right of every citizen'. The EMA Leadership wants to work at the grass root and serve as a link between all working strata related to emergency services and has pledged to support the Ministry of Health and Family Welfare and work in tandem with the Government to realize the dream of quality emergency care to all.

INDUSEM Leader Vice Chancellor Dr. OP Kalra wins Dr. BC Roy Award for 2016

Honorable Vice Chancellor of **Pandit BD Sharma University of Health Sciences, Rohtak, Haryana** Professor Dr. OP Kalra was awarded the Prestigious 2016 Dr. BC Roy Award..

It is a matter of great pride for INDUSEM that Dr. Kalra is being given the Prestigious Dr. BC Roy Award.

A Nephrologist with fantastic Leadership Skills Dr. Kalra took charge of PBDSUHS 2015. He spearheaded the INDUSEM Congress in 2011 and 2015. The INDUSEM Congresses of 2011 and 2015 were one of the most successful INDUSEM Meetings held. He continues to be an active proponent of Emergency Care. In 2015 as soon as he assumed charge as Vice-Chancellor he started the process of Commissioning the first Trauma Center in Haryana and also starting a Post Graduate Training Program and a Department of Emergency Medicine.

"Dr. Kalra in his tenure as VC of PBDSUHS has led many game changing initiatives which have catapulted his University to being a contender for the list of Top Medical Institutions in South Asia. Apart from being a master educator, researcher and avid reader he has fantastic Leadership Skills which are second to none. He Facilitates Multidisciplinary Team Work as a true leader. His vision to transform the Health Care in Haryana is reflected in all his initiatives. I am very happy for him and his family and wish him all the best. He well deserves this prestigious Recognition" Said INDUSEM CEO Dr. Sagar Galwankar.
